

# **FLUOROSAFE COVERS FOR FRAGMENT RETENTION**

## **DO - IT - YOURSELF FITTING**

As regulations become more stringent for the covering of lighting used in sensitive areas such as food preparation and public access areas like leisure centres, pubs, clubs, theatres etc., more and more organisations are having to consider how best to provide the protection required.

Of course, Holscot already offers a full range of lamps covered with **Fluorosafe** Shatter Resistant Lamp Covers for *maximum fragment retention*. The High Molecular Weight Fluoroplastic Material offers enhanced mechanical protection with a lifespan which exceeds all maximum quoted lifespans for the standard Fluorescent Tubes of the major lamp manufacturers.

However, in many cases, companies do not wish to hold stocks of covered lamps in a myriad of different lengths.

Holscot offers the flexibility of providing our customers with **Fluorosafe Self Fit Heat Shrinkable covers** which can be cut to length and fitted as and when required. Dependent on the quantity involved, the covers can be fitted individually using a hand held hot air gun or for the more volumous users, a tunnel oven like that shown here, can be worth the investment.

*We would, of course, be happy to supply  
the hot air gun or the Tunnel Oven*

### **Fluorosafe** covers

Size	Dia	Lengths Available
T5	16mm	4' (1.2m), 5'(1.5m), 6'(1.8m), 7'(2.1m), 8'(2.4m)
T8	26mm	4' (1.2m), 5'(1.5m), 6'(1.8m), 7'(2.1m), 8'(2.4m)
T12	38mm	4' (1.2m), 5'(1.5m), 6'(1.8m), 7'(2.1m), 8'(2.4m)

*Custom Extrusion a speciality*
