

# TEFLON\* FUEL BAGS

- ◆ Made from 100% Teflon
- ◆ FEP ( PFA and ETFE also possible)
- ◆ Resistant to virtually all fluids and most gasses
- ◆ Thin Wall = Low Weight
- ◆ No outgassing at low vacuum
- ◆ No high front end tooling charges
- ◆ Quick delivery and prototypes a speciality
- ◆ Pigmented film can be used
- ◆ Outer surface can be etched to allow bonding to Carbon Fibre, Flexible Elastomer or Metals.
- ◆ Outer surface can be plated for extra inertness.

For 30 years, Holscot has been at the forefront of technology to manipulate Teflon\* Fluoroplastic Films. The development of unique, sophisticated techniques to weld thermoform and chemically treat these difficult materials provided the basis for the concept of Teflon\* Fuel Tanks. Major users have included the Ministry of Defence, British Aerospace and Astrium.
